1 JOYSTICK

3 BUTTONS:   MISSILE  
                  MACHINE GUN  
                  SUPER WEAPON

4. VERTICAL MONITOR
5. CONTINUATION FEATURE

#### DESCRIPTION:

The player has been issued an emergency order. He must save the earth from being conquered by enemy forces. He climbs into his helicopter and prepares for intense aerial combat. Shooting oncoming enemy aircrafts and bombing the enemies below, he tries to make his way through the different stages to reach the enemy base. When he finishes the first stage, he is transported to his next mission by an aircraft carrier. He hops into his jet fighter and prepares to face more adversaries. The types of enemies facing him in each stage include jet fighters, tanks, ships, helicopters, and aircraft carriers. The player must also be aware of unseen enemies and surprise attacks.

Different kinds of power-ups can be obtained throughout the game. These include:

- 3 Way: Bullets fire forward, right, and left.
- Laser: Player can shoot double lasers.
- Triple: Missiles are fired that spread out three ways in front.
- Vulcan: Rapid bullets are fired in the directions controlled.
- Bomb: Air-to-ground missiles are extra powerful.

There is an additional super weapon that destroys all the enemies on the screen at once. However, use of this weapon is limited.

A-JAX contains two different types of stages: 2-dimensional and 3-dimensional. In the 2-dimensional stage, the player controls a helicopter. In the 3-dimensional stage, the player commands a jet fighter.
